

“As a former U.S. Navy SEAL, I was faced with many unique challenges to gain access to hardened facilities. The Rapid Access Tool is without a doubt, a must for the Special Operations Community. I have used this tool to breach armored vehicles in seconds.”

Ray J., Former U.S. Navy SEAL

“In a city like New York, we were faced with hundreds of armored vehicles and many of the buildings’ windows and doors have been reinforced and retrofitted for security. The Rapid Access Tool is an amazing tool for gaining access to these spaces. It is a great tool for the rescue community.”

Mark B., New York City Fire Department Rescue 4 (ret.)

“The R.A.T. device is brilliant and fills a desperate need for both rescue and breaching of armored vehicles. I can think of several situations where I wish we had had this simple, effective device. I have seen it safely breach an armored vehicle in literally seconds with no risk to the occupants.”

Jeff W. US Military Special Operations

The patented Rapid Access Tool was designed by a former, Firefighter and member of the United States Secret Service. The inventor has worked on numerous security projects throughout the World and has a distinguished record of solving complex safety and security problems.

The Rapid Access Tool is engineered to be compact and provide the operator with a simple tool and method to gain immediate access into armored vehicles and other ballistically protected or reinforced spaces.

Uses for the Rapid Access Tool

- Armored Vehicle Rescue
- Breaching Buildings with Ballistic Windows or Doors
- Ventilating Ballistically Protected Spaces
- Forcible Entry
- Emergency Extrication

Who Should Use the Rapid Access Tool

- Special Operations Units
- Fire Departments & Rescue Squads
- Law Enforcement - S.W.A.T
- Protective Security Details
- Rapid Response Teams
- Technical Rescue Teams
- Armored Vehicle Owners / Operators

STEP 1

Drill the Hole.

STEP 2

Insert the Rapid Access Tool into the hole.

STEP 3

Remove the barrier.

Tactical Operator Kit

Includes Fast Pack and Support Pack

The **Fast Pack** is packaged in the smallest possible hard case. This deliberate separation of the primary rescue equipment from the spare and support equipment allows the user to quickly and easily access the tools inside the case when needed. The Fast Pack is field deployable from a vehicle to an emergency site by one person and can be transported in the passenger compartment of a standard size vehicle. **The Fast Pack includes the following equipment:**

- (1) Pelican Case 1520 • (1) Cordless Drill with Battery attached • (1) Specialty Drill Bit
- (1) Rapid Access Tool (R.A.T.) with Gated Hook • (1) Recovery Strap (30' X 3") (Total Weight 29 lbs)

The **Support Pack** is the second of two kits that comprise the Tactical Operator Kit. This allows the user to easily access the tools inside the case when needed. This case can be stowed in the trunk compartment or in other out-of-the-way areas of a vehicle. The Support Pack is used to secure spare and support equipment for additional rescue operations.

The Support Pack includes the following equipment:

- (1) Pelican Case 1520 • (1) Spare Battery Pack • (1) Specialty Drill Bit
- (2) Rapid Access Tools (R.A.T.) with Gated Hooks • (1) Recovery Strap (30' X 3") • (1) Battery Charger
- (1) Lubricant • (1) Informational Video and product information • (1) Cleaning Cloth (1) Drilling Depth Guide Rod (Total Weight 29 lbs)

CEO Kit

The CEO Kit is packaged in the smallest possible hard case that allows the user to easily access the tools inside the case when needed. This case is designed to be transported in a standard size vehicle to an emergency site. Designed specifically for small protective details and corporate clients.

The CEO Kit includes the following equipment:

(1) Pelican Case 1550

(1) Cordless Drill with Battery attached

• (1) Specialty Drill Bit

• (2) Rapid Access Tools (R.A.T.) with Gated Hooks

• (1) Recovery Strap (30' X 3")

• (1) Battery Charger

• (1) Lubricant

• Informational Video and product information

• (1) Cleaning Cloth

• Drilling Depth Guide Rod

(Total Weight 41 lbs)
